Chase game is set up with students forming a circle.

Children hold hands and lift them in time to the ostinato "Up Down"

One child is a 'cat' and begins on the outside of the circle

Another child is the 'mouse' and begins the game on the inside of the circle.

Neither 'animal' may move until the arms are raised and then they may move in or out of the 'mouse holes' until the 'mouse' is caught by the 'cat'. They then choose another 'mouse' and 'cat' and the game begins again..
